

Athens, 21 January 2016

To whom it may concern

Our Company **Labea Yachting** was founded in 2000 mainly serving as a maritime consultant while at the same time making investments for future sales and charters in the luxury yacht industry. Our love for the sea gave rise to our interest in yachting which later became our passion. Today we continue to pour all our passion and experience into our profession which makes us proud to do what we do.

We are one of the most preferred companies in the services and shipping industry on the Greek and International markets.

We are also cooperating with **Lampsea™** which is our main supplier for high-end marine spotlights for under or above water LED illumination applications. Their services and products have always been exceeding our requirements and moreover our customers' expectations yielding very impressive results on safe mooring, night swimming, long range spotting, fishing and many more.

Lampsea™ can be considered as one-of-its-kind professional in manufacturing high performance LED illumination products blended with the precision quality that is hard to find nowadays in the global market and can fulfill the passionate customers who are strongly focused to such high quality products.

Yours faithfully

LAZAROS ZARIFIS
PRESIDENT
