

LAMPSEA™: PRESS RELEASE

18th April 2017

At the recent Seawork2016 International Exhibition which was held from June 14-16 in Southampton-UK, LAMPSEA™ passed successfully amongst the leading international innovative marine industry manufacturers.

More precisely our products that excelled were both underwater-amphibious single LED Z-series spotlights and infrared LED tactical programmable beacons as well, model BELZ4 IR / BEMCU, dedicated exclusively for military long-range Morse-Encrypted signaling applications where "radio silence" is mandatory.

Throughout the entire exhibition duration our products were displayed at the "Innovation Showcase" where all visitors had the opportunity to see and get to know their specificities from close.

LAMPSEA™ unique and innovative IR beacons have been proudly supplied to the Greek Armed Forces providing typically 6 nautical miles "line-of-sight" visibility.

It is clearly herein mentioned that LAMPSEA™ has the capability to manufacture friendly recognition IR beacons at even longer line-of-sight ranges.

All LAMPSEA™ products do embed **patented** innovative technology. All Rights Reserved.

For more information about our products please call: 201-284-7981 or 690-687-1020 or email: sales@lampsea.com. We will respond at your earliest convenience. Web: www.lampsea.com
